the best...

Feeling

www.feelingspas.com/en_us

FIRST COMES EMOTION AND THEN COMES FEELING

The emotion of your personal spa paradise will be absorbed by a **Feeling** like you've never known. The **Feeling** calls your name. It combines styling, comfort, ambience, serviceability and exceptional massage all in one truly portable and affordable spa. As its name suggests, the **Feeling** will trigger your emotions and command your attention. It's sleek, modern design not only exudes practical features, but it also blusters with features like a back lit, cascading waterfall, external LED scone lighting, hand recesses for easy portability and 100% accessibility to the plumbing and equipment. With unequaled comfort, ambience and practicality, the **Feeling** delivers a truly gratifying spa ownership experience.

The layout of the **Feeling** follows a traditional pattern with added versatility. You can relax in either of the two opposing lounge chairs or you can stretch your legs out and lay back in the full length lounge chair. The lounge chair also enables you to swing your legs around, sit up and enjoy a family conversation. The **Feeling** also contains a step in / cool down seat for easier and safer entering and exiting to and from the spa. This step also doubles as a cool down seat. If total emersion in the water makes you feel a bit overheated, sit on the cool down seat and enjoy the hot water comfort under your terms.

The **Feeling** is a true "Plug & Play" portable spa. It needs no special site preparation**. The bottom of the **Feeling** is totally protected and the spa can be set on any solid level surface. No electrician is needed. The **Feeling** comes standard with a 15', 120V GFCI protected cord that is ready to be plugged into a dedicated 15 amp standard wall receptacle. For those who plan to use their spa for long periods of time in cold weather, it can also be converted to 240V* operation for better heating efficiency. The **Feeling** is very portable. It weighs approximately 350 lbs., dry weight, and it has built in hand recesses for easy lifting and handling. It can easily be transported in the back of most pick-up trucks, on a small trailer or in a moving truck so you don't ever have to worry about leaving your spa behind again. If your are looking for simplicity, comfort, quality, portability and affordability, **we can provide the best feeling!**

Because the sense of touch can transmit positive vibrations and pleasant feelings, we added elevated protrusions to the armrests of the "Feel It" Station seat.

Not only will you enjoy your hydro therapy massage, but you'll also experience a pleasant feeling in the palms of your hands as you rub them back and forth over the massage area.
